**Special Edition, Inc.** was formed in the early 1980's and has been instrumental in the evolution of the Specialty Automotive industry. By 1986, Kevin Hines of Special Edition, Inc. and Chuck Beck of Beck Development formed a partnership and the concept of easy to complete, high quality specialty cars was born.

Our engineering methods and unparalleled design criteria combine to produce a superior product that will provide years of driving excitement. Our world wide reputation for quality, honesty and extraordinary customer service is the result of 30+ years of dedication to our BECK products and the people who love them.

Deluxe Pre-Assembled Body Package  
***Starting at \$28,495.00***

## What is it?

The “**DELUXE PRE-ASSEMBLED BODY PACKAGE**” program provides the specialty automotive enthusiast with a quality product, in a complete and comprehensive package. This alternative affords a savings over the “Roller” or “Turn Key” versions by allowing you, the customer, to supply a portion of the parts and labor relating to the final assembly procedure, yet does not demand an inordinate amount of specialized skills or professional assistance such as painting, wiring, and upholstery.

This package includes ALL of the following:

- The complete hand-laid fiberglass body, painted with Automotive quality base coat/ clear coat. The doors, front hood with support rod, and rear deck lid with support rod are hinged, latched, weather stripped and fully adjusted.
- The body comes pre-mounted to a 3” tubular steel frame that is an integral part of the body/chassis system. It includes a fully adjustable front axle beam with torsion bars installed and rear suspension components complete to the spring plate assemblies. *Tubular steel is an extremely strong method of construction and gives the Spyder excellent torsional rigidity resulting in crisp handling, consistent door gap, and superior fit and finish.*
- The self-parking, 2-speed windshield wiper system is completely installed and wired.
- All of wiring is completely installed. This includes the 3-gage cluster, all switches, relays, engine harness, lighting and a complete fuse panel. The steering column with turn signal, emergency flasher and wiper switch is installed.
- The removable convertible top and steel scissor mechanism is completely assembled and operational.
- All latches, hinges, and release cables are installed and fully adjusted.
- Full leather interior is completely installed including original style, slotted bucket seats, leather wrapped steering wheel, shifter and parking brake boots.
- The interior is completely carpeted.
- The accelerator, parking brake, and clutch cables are installed. The cable shift mechanism is complete and pre-installed.
- The fuel tank, aluminum “Quick fill” gas cap, and fuel lines are installed. ○ Pedals, dual circuit master cylinder, reservoir, and brake lines are all installed.

The “**DELUXE PRE-ASSEMBLED BODY PACKAGE**” is extremely complete. The builder need only supply the engine of his choosing, a transaxle, brakes, wheels, tires, lights, fluids and some hardware (most items available in the optional packages), some basic mechanical ability and approximately 25 to 30 hours of assembly time.

*Prices are subject to change without notice. A \$5,000.00 deposit must accompany all orders. Please call for availability.*

## DELUXE “ROLLER” PACKAGE

Starting at \$40,365 (less engine)

F.O.B. Bremen, Indiana

### What is it?

The “Deluxe Roller Package” comes “rolling” to your door, ready to accept the engine you choose.. This package is ideal for someone who has a very specific engine supplier or desire to install a unique type of power train (i.e. battery operated) into our Beck Spyder.

This package includes ALL of the features of the “**Deluxe Pre-assembled Body Package**”, plus the following items:

- A 4-Speed manual transaxle of your choice. (All transaxles are the swing axle style but may be modified with high performance parts, a variety of gear sets, and upgraded from drum to disc brakes for an additional charge.)
- The brake system is complete and operational, as is the parking brake system. Fine tuning of the alignment is still required.
- The steering components are completely installed and operational.
- Head & taillights, turn signals and license plate light are installed and wired.. ○ The engine harness is in place and ready to be attached to the motor.
- A set of 5 wheels and tires are mounted and balanced. Tire brands may vary with availability. Tire upgrades are available at additional cost.
- The side & rear view mirror are installed, along with the horn grills. ○ “Spyder” badges are installed, left and right.
- Other optional items may be ordered and pre-installed as well. Please see the MSRP sheet for a list of our most popular add-ons.

### Pricing Breakdown:

Deluxe-Body Package.....	\$28,495
Roller Package Assembly Fee (Partial).....	\$4,250
Standard 4-speed manual Pro Street 4.12 Ring & Pinion transaxle (estimate).....	\$2,750
